

## 5. INTERLIGHT

Interlight is a glazed partition system consisting of glazed panels from floor to ceiling, without any horizontal or vertical profiles. The glazed panels are assembled with a unique design which gives a seamless stable and modern appearance. The possibilities in glazing are almost unlimited, from standard to polarised glass, which can be transparent or opaque.

- Complete glass wall system
- Special clear glass to glass joint
- Single glazing safety glass
- All colours available
- Excellent in combination with our other wall systems

### Partition Thickness

25 mm profiles  
71 mm door frame thickness

### Sound Insulation
